History

Amendment 20 labs (A20labs) was launched in 2005 when the founder ('Dr. Blaze') experienced severe shoulder trauma (a climbing accident) which developed into chronic pain. After suffering the horrible side effects of traditional pain medication (like hydrocodone), the next years were spent engineering new strains of medical marijuana that provided exceptional and gentle pain relief. Other patients and friends drove these strains to be shared more widely within the MMJ community which eventually lead to founding the business you now know as A20labs. A20labs is now the benchmark for strain research and providing complete in-home care to Colorado MMJ patients. Our success is a direct result of the happiness, success, and support of our patients.

Our Passion

Each day we see bold proof of the power of medical marijuana. Patients with Crohn's disease, horrible migraines, chronic pain, glaucoma, AIDS, severe menstrual cramps, cancer, fibromyalgia, and epilepsy (to name only a few debilitating diseases) receive gentle, natural, and safe relief from their symptoms. Medical marijuana (MMJ) is by far the most powerful and gentle healing compound available in the world today. The science of using medical marijuana is in its infancy. Our life passion is to see MMJ mature as a **science** and to help people with crippling illnesses find new and greater happiness

Mission Statement

A20labs is a safe and confidential in-home caregiver service that consistently provides best-in-class "wrap-around" services to medical marijuana patients in Colorado. A20labs is also proud to engineer radically new mmj strains to ensure our patients have cutting edge tools for improving their health. A20labs exclusively provides services under the legal requirements of the state of Colorado as well as the individual laws of the counties and cities in Colorado. All products are produced in Colorado by A20labs at state-of-the-art facilities that are custom designed to ensure maximized potency and consistent quality/safety. The A20labs business and funding model is designed to ensure patients receive ever evolving services indicative of best-in-class health care providers for the entire duration of their medical needs. We do not provide and never will provide a traditionally dispensary storefront. We only provide services to registered patients to whom we are official caregivers. The number of patients we service is strictly controlled such that we can track the health and success of each patient. A20labs also provides access to top health professionals in the fields of massage, psychotherapy, and holistic medicine that can complement a patients treatment regimen. Our bottom line is: "**Excellence in Medical Care**".

Service

Vision: Service delivery at A20labs is founded on four pillars:

1. Patient confidentiality and security.
2. An ever evolving treatment program for every patient.
3. Reliability and consistency in service delivery.
4. Providing patients a service interface that is simple and enjoyable.

If our patients succeed - we succeed.

Privacy/Confidentiality/Security: Many medical marijuana patients desire complete privacy regarding their treatment regime and thus, do not enjoy visiting traditional dispensaries or growing their own medication. A20labs is founded and focused on providing discrete, private, and confidential in-home delivery/caregiver services to meet the needs of these patients. Each and every A20labs customer representative is trained to ensure that patient security is protected - these representatives are easily identified by their subtle uniformed attire.

Hours of Operation: The office is open 9AM to 9PM Monday through Friday, 9-6 Saturday. Deliveries can be scheduled outside these office hours.

Service Area: Colorado Front Range and Summit County/Vail.

First Objective: In the early lifecycle of your relationship with A20labs we seek to establish a long term treatment program for your unique health concerns/objectives. This program seeks to match strains (and strain rotation), the use of edibles, as well as the use of other holistic treatments that complement the lifestyle,

history, and treatment needs of each patient. This program and its ongoing refinement is a key element of providing our patients service excellence.

Initial Consult: If you are a licensed medical marijuana patient, the first in-home consultation will review your medical history as well as products or combinations of strains that will be optimal in treating your medical condition. The process of tracking your treatment progress will also begin. If you are seeking to become a licensed patient, A20labs personnel will council you on all aspects of becoming a legal patient along with the most effective methods for treating conditions.

Obtain a Medical Marijuana License: A20labs personal are experts in guiding patents through the process of obtaining licensure in the state of Colorado as a medical marijuana patient.

Debilitating Illnesses: A20labs provides in home care/delivery services to ensure that patients with debilitating illnesses have nearly round-the-clock access to medication.

Illness Targeted Product Development: A20labs is constantly striving to improve the fundamental effectiveness of our patients treatment regimes with new strains of medical marijuana and supporting products.

Ancillary Services: A20labs also provides access to top health professionals in the fields of massage, psychotherapy, and holistic medicine that can complement patients treatment regimen.

Current A20labs Stains

Coupe de Grace: Custom developed and tested by A20labs for over two years - our most popular strain. Designed for daily management of chronic pain. An uplifting and energizing strain. Very highly reviewed. 70% sativa - 30% Indica.

AK47: The most award winning strain in history. Four time Cannabis Cup award winner. A long lasting alert but mellow cerebral effect with a THC content at over 20%. Excellent for arthritis, melanoma, and moderate cancer patients.

Island Sweet Skunk: BC Bud award winner and a world favorite. Also a best seller. A surprisingly relaxing and sedating effect for a mostly sativa based strain. Effective for more common headaches, multiple sclerosis, and mild stress.

Big Bud: Two time Cannabis Cup award winner. Mostly indica. A sweet and spicy flavor with a mellow long lasting effect on the body. Excellent for patents experiencing more substantial joint/muscle pain and stomach trouble.

Double Diesel: Rare mix of the award winning NYC Diesel and sour diesel. Fairly strong and narcotic effect for the treatment of more debilitating illnesses like HIV and advanced cancer patients.

God's Gift: A rare strain that most people say (amazingly) lives up to it's name. 25% indica / 75% sativa. A warm and enveloping high without being weighed down. Slow to take effect and an effective treatment for anxiety and depression.

Flo: 60% Sativa / 40% Indica with motivational high that is unique and indicative of Sativas. Rated #1 at the 1996 Cannabis Cup by CC magazine. Used for glaucoma and more mild symptoms of movement disorders or Fibromyalgia.

Diesel LowRyder: A Custom A20labs strain that is an exotic mix of NYCDiesel and LowRyder, 30% sativa - 70% indica. Strong narcotic effect for use in treating nausea and neuropathic pain, also headaches/migraines.

Northern Lights: *Coming Soon.* Three time Cannabis Cup award winner. Mostly indica. One of the world's most famous strains. A gentle inhalation experience followed by a powerful physical effect. Used to treat insomnia, stress, and late stage cancer.

G13 Haze: *Coming Soon.* Recent two time Cannabis Cup winner - A20labs is one of the first to offer in Colorado. Rumored to be originally produced in secret US labs and proclaimed the world's strongest strain. Valuable for the treatment of severe pain and life threatening illnesses.

Grand Daddy Perp: *Coming Soon.* A sweet grape aroma with enduring effects that are energetic rather than sedating. A smooth body high. Good for chemotherapy patients. Has won first prize in four MMJ competitions.

A20labs Edibles

Edibles are an important part of virtually every treatment program as it enables THC and cannabinoids to remain in a patients system for a longer period of time compared to smoking based ingestion. Edibles also allows a patient greater discretion in public settings or while traveling.

A20labs ensures that the potency of our edibles are among the highest in the industry such that our patients can count on receiving the value they deserve and to ensure patients receive dosages that substantively effect their conditions. Current products include:

Organic Olive Oil: Very potent. An excellent low cholesterol option for cooking or dipping. 3 Oz Bottle.

Tincture: Alcohol and glycerin based organic tincture. Provided in a convenient eye drop bottle which is excellent for travel. Super potent. Available in .5oz, 1oz, and 2 Oz sizes.

Peanut Butter Cups: Our most popular edible modeled after the world famous Recess cups. Very potent. Available in white chocolate, dark chocolate, and milk chocolate.

Loli Pops: In a variety of flavors (strawberry/grape/apple) for long lasting satisfaction.

Handcrafted Natural Root Beer: A true favorite and a unique offering by A20labs. Old style recipe hand crafted and smooth. Zero "weed" taste. Low acid recipe to assist patients with sensitive stomachs.

Berry Blaze Natural Pop: Another unique offering by A20labs. A blast of mixed berry flavor with zero "weed" taste. Low acid recipe to assist patients with sensitive stomachs.

Chocolates: White and milk chocolate blend in a variety of attractive shapes. Six chocolates per bag.

Hard Candies: Classic sugar candies in a variety of flavors (Apple, Grape, Strawberry, and Raspberry) for a great ride. Purchased by the gram.

Honey: A classic favorite for adding to tea and all forms of cooking. Available in 2oz and 4oz sizes.

A20labs also routinely produces baked goods like peanut butter or chocolate chip cookies for its patients. As these items are more perishable than the items listed above, advanced notice is desired and A20labs will deliver.

A20labs is always seeking ideas from our patients for new edibles and offers '*cannabinoid catering*' services for those with special dietary needs.

Why We Are Better

- 1.) A20labs custom engineers strains of medical marijuana to better target specific illnesses. Some of our strains have taken years to engineer, are difficult to grow, and have been ruinously tested to statically demonstrate their effectiveness. We are constantly working on new strains (with the aid of our patients) to render them the greatest possible relief.
- 2.) A20labs exclusively provides complete, safe, and confidential in-home care services to our patients. We also ensure that patients with debilitating illnesses have wrap-around services.
- 3.) The health of each patient is qualitatively and quantitatively tracked on a consistent basis to ensure effective and maximized response to medication. Success in treating a patient's medical condition is the primary objective at A20labs.
- 4.) A20labs is 100% compliant with state and local laws governing MMJ at all times - no exceptions. As such, we only provide services to registered patients whom have assigned us as their caregivers and also limit the total number of patients under our care. A20labs exclusively provides complete in-home caregiver services and does not operate a storefront dispensary.
- 5.) A20labs grows 100% of its own medicine in Colorado and rigorously supports the "Always Buy Colorado Cannabis" campaign, we also produce all our own edibles. Patients who receive "beaster" and "swag" from California at many dispensaries are getting ripped off. We grow all our own to insure perfect and consistent quality.
- 6.) Medicine is available at the lowest possible prices to assist the greatest number of people. To this end, A20labs also offers an assistance program for patients experiencing financial crisis.
- 7.) A20labs is committed to providing the highest potency in its edibles and in ensuring a maximum dose of cancer fighting terpenes exist in each edible product.
- 8.) A20labs will help new patients to legally register in the state of Colorado.
- 9.) A20labs provides a breadth of products specifically targeted at treating the illnesses known to benefit from medical marijuana use.
- 10.) A20labs provides access to top health professionals in the fields of massage, psychotherapy, and holistic medicine that can complement a patient's treatment regimen.
- 11.) A20labs personnel have been or are current medical marijuana patients and as such uniquely understand the techniques and potential for treating medical afflictions.

12.) Medication is consistently of the finest medical quality. A20labs grows and produces all its products at its own state-of-the-art facilities under strict quality controls.

Producing the Finest Medicine

Commercial quality growing systems: Dual redundant and fault tolerant systems are used in all stages of production for HVAC, lighting, CO2, and dehumidification systems. As such, A20labs provides smooth and consistent flow of medicine to its patients at all times.

Clean Room Growing: All plants are grown in a custom sealed clean room environment to ensure highly consistent quality and potency. No human hands ever touch a plant in its production lifecycle.

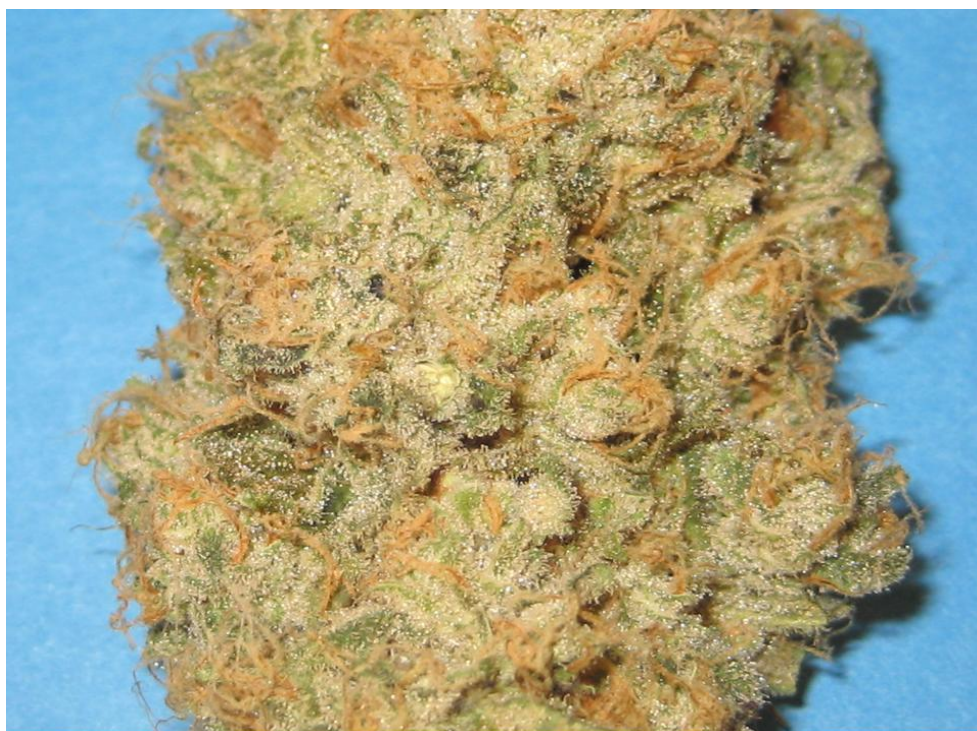

Proprietary Lighting System: A proprietary mix of lighting technology is used across the growth cycle to increase potency and ensure a gentle experience for patients who smoke.

Proprietary Nutrient System: Computer controlled and highly tuned atmospheric conditions along with custom blended nutrients are used across the growth cycle to increase potency and expand the spectrum of psychotropic compounds produced in plants. Nutrient cycles are matched to each plant strain to increase potency.

Organic Methodology: It is virtually impossible to produce medical quality marijuana that is 100% organic. As such, A20labs endeavors to use organic production methodologies to the greatest extent possible.

Potency Stressing: Most medicine is harvested as soon as the plant has reached maximum bud weight. Not at A20labs. We use a proprietary technique to 'stress' the plant at the end of its bloom cycle to maximize THC and cannabinoid levels.

Perfect Harvesting: All product is harvested into a strictly controlled environment at 60% relative humidity that provides for slow drying as well as the

removal of the bulk of water from the bud. This ensures that our patients pay for medicine instead of water. Product is then aged to provide the smoothest ingestion experience. All trimming is done by hand.

Becoming an A20labs Patient

A20labs personal are experts in guiding patents through the process of obtain licensure in the state of Colorado as a medical marijuana patient. To become a licensed patent of A20labs:
